PROFILE

Civil Engineer with 4+ years' experience in utility-scale photovoltaic projects (>300 MW). Specialized in civil works for energy projects with expertise in site supervision, inspections, and pre-design assessments. Extensive exposure to electromechanical installations and grid interconnection works, and PAC documentation. Skilled in identifying constructability challenges and coordinating multidisciplinary site activities to deliver safe, on-time, and compliant projects.

EXPERIENCE

Construction Supervisor — METLEN Energy & Metals — Domokos, Phthiotis, Greece (Jul 2025–Present) – (11 MW) (Fixed Structure)

- Supervised civil works (roads, piling, drainage, substation foundations) for 11 MW PV park within 80 MW cluster, ensuring milestones on schedule and zero incidents.
- Built Excel-based supervision tools that cut reporting time by ~30%.
- Deployed drone surveying for progress verification and contractor compliance.
- Coordinated E&M works, communications, and security systems through final connections.

Construction Supervisor — METLEN Energy & Metals — Volos, Magnesia, Greece (Aug 2024–Jun 2025) – (72 MW) (Fixed Structure)

- Led pre-design site inspections, flagging risks early and reducing redesign cycles.
- Produced accurate as-built drawings; enforced schedule, quality, and H&S compliance.
- Oversaw interconnection works and HV substation upgrade activities.

Site Engineer — METLEN Energy & Metals — Larisa, Thessaly, Greece (Sep 2023–Jul 2024) – (21 MW) (Fixed Structure)

- Directed surveying, cut & fill, and grading; supervised concrete works (inverter stations, transformer pads, trenches).
- Coordinated mounting structures, module installation, and string wiring.
- Monitored testing and labeling and supported final system handover (PAC).

Site Engineer — METLEN Energy & Metals — Ptolemaida, Kozani, Greece (Mar 2022–Aug 2023) – (200 MW) (Single-axis Tracker structure)

- Supervised civil works including cut & fill, substation foundations, roadworks, drainage.
- Managed a team of foremen, delivering works per schedule and quality.
- Conducted material take-offs, market research, and cost estimation.
- Maintained client communication with daily reports.

Earlier Experience — Thessaloniki, Greece (2021)

- **Site Engineer, Keystone Development:** Supervised detached houses & apartment buildings.
- **Site Engineer, Synarmogi Construction:** Industrial facility expansions & renovations.

EDUCATION

Aristotle University of Thessaloniki (AUTH) — Diploma in Civil Engineering (2014–2021)

Specialization: Transport and Project Management

Diploma thesis: Research on the properties of bitumen with crumb rubber (2019)

Publication: Investigation of Selected Properties of Crumb Rubber Modified Bitumen with Different Rubber Contents, Mairepav9, Zurich (2020)

CERTIFICATIONS

- EASA UAS A1/A3, A2 Drone Pilot License
- First Aid (ERC, AED)
- Driving license: B & C category
- Technical Chamber of Greece (since 2021)

MILITARY SERVICE

Greek Army (2019–2020)

SKILLS

AutoCAD (advanced) · Civil 3D (advanced) · Global Mapper · Excel (advanced) · Drone Surveying · early-stage site inspections · fixed/tracker structure · Site Supervision (civil and electromechanical works) · HSE Support
